PROFESSIONAL SUMMARY

Motivated and detail-oriented Frontend Developer with experience in building scalable, AI-driven applications, automation tools, and modern web interfaces. Strong expertise in Python, JavaScript, Typescript, and frontend frameworks including React and Next.js. Skilled in developing and integrating Machine Learning models, crafting efficient automation workflows, and delivering responsive, user-friendly web applications. With a track record of completing 5+ projects involving AI integration and process automation, I bring a blend of clean code practices, problem-solving ability, and a passion for creating high-performance digital solutions.

Professional Experience

N6N, Junior Next.js Developer (Remote)

July 2025 - December 2025

I developed and deployed scalable frontend applications using React and Next.js, integrating secure RESTful APIs and building responsive UI components with TypeScript and Tailwind CSS. Additionally, I implemented automated testing procedures and quality assurance checks, resulting in a 30% reduction in production bugs.

Technical Crime, Front-end Developer (Remote)

February 2024 – August 2024

As a skilled front-end developer, I excel in creating intuitive and responsive web interfaces, from coding seamless navigation in HTML and CSS to designing engaging buttons and controls that enhance user experience. I specialize in resolving functionality issues, including removing dead links, and ensuring the site is always up to date. My experience extends to building and maintaining efficient, reusable C# code, prioritizing performance and responsiveness to deliver high quality, robust applications. My dedication to continuous improvement ensures the best possible outcomes in web development projects.

Selected Projects – AI, Frontend & Command-Line Development

● **Agri Tech AI – Next.js, Docker, Hugging Face, Micro services, OpenAI Agent SDK**
Designed an AI-powered agricultural platform using four Agentic AI models, supported by a fully containerized micro services architecture built with Docker for scalable and isolated deployment. Developed and refined automated matching algorithms, improving user compatibility accuracy by **40%**.
Live Project: https://farm-smart-ai.vercel.app/

● **Frontend Portfolio – Next.js & Tailwind CSS**
Showcased a collection of modern, responsive, and performance-optimized UI projects built using React, Next.js, and Tailwind CSS.
Portfolio: https://hb-portfolio-three.vercel.app/

● **TypeScript Command-Line Tools**
Created and published multiple CLI utilities using TypeScript and Node.js, accessible via NPX for quick global execution.
Examples include:
• npx @hamza2004/std_management-system • npx @hamza2004/quiz • npx hamzabhatti-atm

• npx @hamza2004/wordcounter • npx hamza2004-currency-convertor • npx hamza2004-todos
• npx hamzabhatti-number-game

Core Skills

HTML • CSS • Javascript • Typescript • Tailwind CSS • .Net Core • Next.js • Ai-Driven Development • Agentic AI with OpenAI SDK • Claude CLI • Gemini CLI • Specify Plus • Python • WordPress

Professional Certification

- Top 10 – Agentic AI Hackathon by Innovista (Ranked among the top participants out of 100+).
- Top 50 – Lablab AI Hackathon (Selected among hundreds of global participants).
- A.I, Metaverse and Web3.0 – Governor Initiative.
- Front-end Development – PFTP (Professional Freelancing Training Program).
- Successfully delivered 5+ freelance projects with a strong emphasis on automation and system optimization.
- Developed and deployed 3+ production applications with complex AI and LLM integration.

Academic Qualification

- **Virtual University of Pakistan**

Bachelor of Business & Information Technology (BBIT)
